

V3.9.0-20210820

Feature Updates

New Features

- Colorful text media supports text stroke.
- Colorful text media supports static multi-line playback and flashing playback.
- Supports off fonts.

Improvements

- Fixed the problem that a black screen is displayed for a long time before the content is displayed when much text is played for the first time.
- Optimized the memory usage during text playback.
- Improved scrolling text to better support ultra-wide screens (wider than 32,767 pixels).

Fixed Problems

- The spacing between lines of text is not the same.
- The actual results of customized text displayed by VPlayer and ViPlex Express are not the same
- Some videos cannot be played completely.
- There is only sound and no pictures during the playback of some videos.
- After VPlayer is bound to VNNOX, if VPlayer is restarted when the computer has no Internet access, VPlayer quits unexpectedly.
- The audio added to text media does not play.
- Play logs cannot be found in some earlier versions of databases.

Remaining Problems

None
